SUMMARY

Aspiring Data Analyst & Data Scientist with knowledge of Python, SQL, Excel, Power BI, Tableau, Pandas, NumPy, Statistics, and Machine Learning. Hands-on experience through projects in data analysis, visualization, and predictive modeling, with a passion for transforming data into actionable insights and data-driven solutions.

EXPERIENCE

Cimpress India, Mumbai | 2.8 Years Experience

Jan 2020 – Aug 2022

Graphics Excellence Specialist | 2021 – 2022

- Collaborated with Ireland-based and cross-functional teams to prepare production-ready artwork and ensure timely project delivery.
- Maintained accuracy and quality standards while meeting project deadlines.

Junior Graphic Designer Trainee | 2020 – 2021

- Prepared product mock-ups to visualize how logos would appear on final printed products and creating print – ready artwork while ensuring design accuracy and quality.

Tools Used: Adobe Illustrator, Adobe Photoshop

TECHNICAL SKILLS

- Database: MySQL
- Data Visualization Tools: Excel, Power BI, Tableau
- Programming: Python
- Python Libraries: NumPy, Pandas, matplotlib, Seaborn
- Statistics
- Machine Learning

PROJECTS

github links

1. BOOKLYTICS | Microsoft Power BI

[GitHub](#)

- Built an interactive Power BI dashboard to visualize book prices, ratings, categories, and stock availability.

2. Fitness Membership Management System | MYSQL

[GitHub](#)

- Centralized gym data in MySQL, reducing manual record-keeping
- Provides data-driven insights to identify popular plans, and improve business decisions

3. Bank Loan Data Analysis Dashboard | Microsoft Excel

[GitHub](#)

- Analyzing disbursement trends and customer segments to improve lending decisions.
- Credit risk monitoring by tracking default rates and repayment behavior, helping banks reduce non-performing assets (NPAs).

4. India Regional Weather and AQI Analysis Report of year – 2025

[GitHub](#)

- Developed Power BI dashboard analyzing daily weather and AQI trends across 92 Indian cities of 2025.
- Visualized regional variations in temperature, air quality, and environmental patterns to derive actionable insights.

5. Calories Burn Prediction | Machine Learning

[GitHub](#)

- Developing a machine learning model to predict calorie expenditure based on user attributes and exercise-related features.
- Currently working on data preprocessing, exploratory data analysis, feature engineering, model building, and evaluation.

EDUCATION

- Bachelor's of Science in Information Technology
University of Mumbai
2018
CGPA: 6.33 out of 7.00
Final Grade: A
- HSC (12th) - Maharashtra State Board
2015

CERTIFICATION

- Masters in Data Analytics and Data Science with
Artificial Intelligence and Machine Learning
(IT Vedant Education Pvt. Ltd.)
Jan 2026 – Pursuing

ACHIEVMENTS

Monsoon Hackathon 2026 – 3rd Prize (Team of 4)

- Secured 3rd Prize in IT Vedant's Monsoon Hackathon 2026.
- Developed a Power BI Flood Prediction Analysis Dashboard to visualize flood data of different Indian Cities and support data-driven insights.
